

Samphira Oil Bioactive: Marine Retinol

Retinol is a classic active ingredient in cosmetics and has been making a big comeback for some time now. However, retinol is not suitable for sensitive skin.

Samphira Oil Bioactive targets the same receptor as retinol and has a comparable effect - but does not cause any inflammatory reactions, even when used twice a day.

The result is smooth skin, fewer wrinkles, refined pores and a radiant, even complexion.

Samphira Oil Bioactive is a natural oil-soluble extract from the sea fennel *Crithmum maritimum*. This plant, which is also used in the kitchen, grows on rocky coasts. The certified organic sea fennel used for Samphira Oil Bioactive comes from the French Atlantic coast.

Proven effectiveness:

- ✓ Increases collagen synthesis
- ✓ Promotes the renewal of the epidermis
- ✓ Reduces inflammatory factors and is also suitable for sensitive skin
- ✓ Reduces pore size

Applications:

- Sensitive Retinol-like Booster
- Slow Aging Day Cream
- Marine Retinol Glow Face Oil

INCI (EU/PCPC) Declaration: Caprylic/capric triglyceride (and) *Crithmum maritimum* extract

Properties:

- COSMOS organic certified
- Oil soluble
- Recommended use level: 0,25%
